

Hey Hackers, are you interested in building on the most scalable web3 software available? This Quick Start Guide includes everything you need to get building on BNB Chain today.

All of our documentation and anything that you could ever need or would like to read up is here, on our official documentation website, find it here:

- <https://docs.bnbchain.org/docs/bnbIntro>

This will include how to get started, learning about the BSC smart chain and core concepts.

Tutorials will show you how to do things such as, join BNB smart chain as a validator, how to run a full node, how to stake BNB tokens on BSC and many other concepts.

- <https://docs.bnbchain.org/docs/bsc-tutorials>

We have a list of tools on this page that you can use to help build on the BNB chain such as BSCScan for visualizing transactions, Mobile wallets and test Faucets on this page here:

- <https://docs.bnbchain.org/docs/learn/ecosystem>

If you want to quickly get started in building out a smart contract on BNB chain, we have a full tutorial on how to do that, including how to set up your machine and getting test tokens here:

- <https://docs.bnbchain.org/docs/chainide>

We even have clonable tutorials on github here where you can find four tutorials creating on the BNB chain here:

- <https://github.com/bnb-chain/bnb-chain-tutorial>

If your wondering where you can find the BNB Smartchain code, the whole open-sourced code resides here:

- <https://github.com/bnb-chain/bsc>

And finally, if you are the type to kick back and watch some videos and soak in concepts and learn about BNB, we have a partnered with Binance Academy and have a host of video on various concepts, technical questions and event business concepts on crypto, Binance and BNB. All of which can be found here:

- <https://www.youtube.com/c/BinanceAcademy>
